To our customers and business partners

Gottenheim, 12.11.2018

## Regulation (EC) No. 1907/2006 (REACH)

Dear Sir or Madam,

According to the European Regulation No. 1907/2006 (REACH), SensoPart is a downstream user. The products, which we supply to you, are non-chemical products (goods). These goods are not required to be registered. For the production of our products, we only use substances and mixtures for which the information required under REACH (EU-MSDS) are available. We use these substances as specified by the manufacturer/distributor.

As a downstream user, we have to pass information about the use of substances of very high concern in the supply chain. We are obliged to inform you as soon as one component contains at least one substance of very high concern with more than 0.1% by mass. This will not restrict or prohibit the distribution and the use of the affected products.

Due to the recent update of the REACH candidate list ([SVHC-List](#)), we would like to inform you that some of our products contain alloys with lead (CAS No. 7439-92-1). The proportion within the alloys amounts to a maximum of 3.5 %. If the affected products are used as intended, the lead will not be released.

Should you require further information on the products used, please make a request to [REACH@sensopart.de](mailto:REACH@sensopart.de).

Kind regards

**Tobias Sexauer**
